

A close-up photograph of a chef's hands in a kitchen. The chef is wearing a dark blue uniform with a red collar. They are holding a sliced tomato over a green cutting board. Several other tomato slices are already on the board. The background is blurred, showing a kitchen environment. A semi-transparent grey box with white text is overlaid on the right side of the image.

For efficient food preparation,
store your ingredients close to hand.

Prep

FOSTER

Prep

For when you need everything to hand

- Perfect food prep refrigeration whatever your operation, with fresh ingredients at your fingertips. So whether you're making pizzas, sandwiches, salads or desserts, you can minimise your kitchen processes whilst maximising your speed of service and profitability.

Safe food storage

Gastronorm pans are recessed into the top to allow the optional hinged night cover to form a complete seal. This enables safe storage of food within the pans during service. Inclined for easy accessibility.

Our Prep Station has been designed with the operator in mind, **all pans and work bench height are within comfortable reach.**

The fan assisted, forced air system delivers even temperature holding to both the counter base and top pan storage section.

The range is presented with a modern, sleek 304 stainless steel exterior and aluminium interior, **placing hygiene at the forefront of design for storing open ingredients.**

Clever inner catch tray stops food from falling into the main storage area, quickening clean down times.

Energy-saving natural hydrocarbon refrigerant as standard across the range.

A raft of options available to suit your preparation requirements, ranging from drawer sections and 150mm deep gastronorm pan arrangements, to the convenience of crumb trays.

Interest-free credit available over 24 months **ZERO** (UK only)
